

How to compile the Source Codes (server.cpp & client.cpp) for Assignment 2

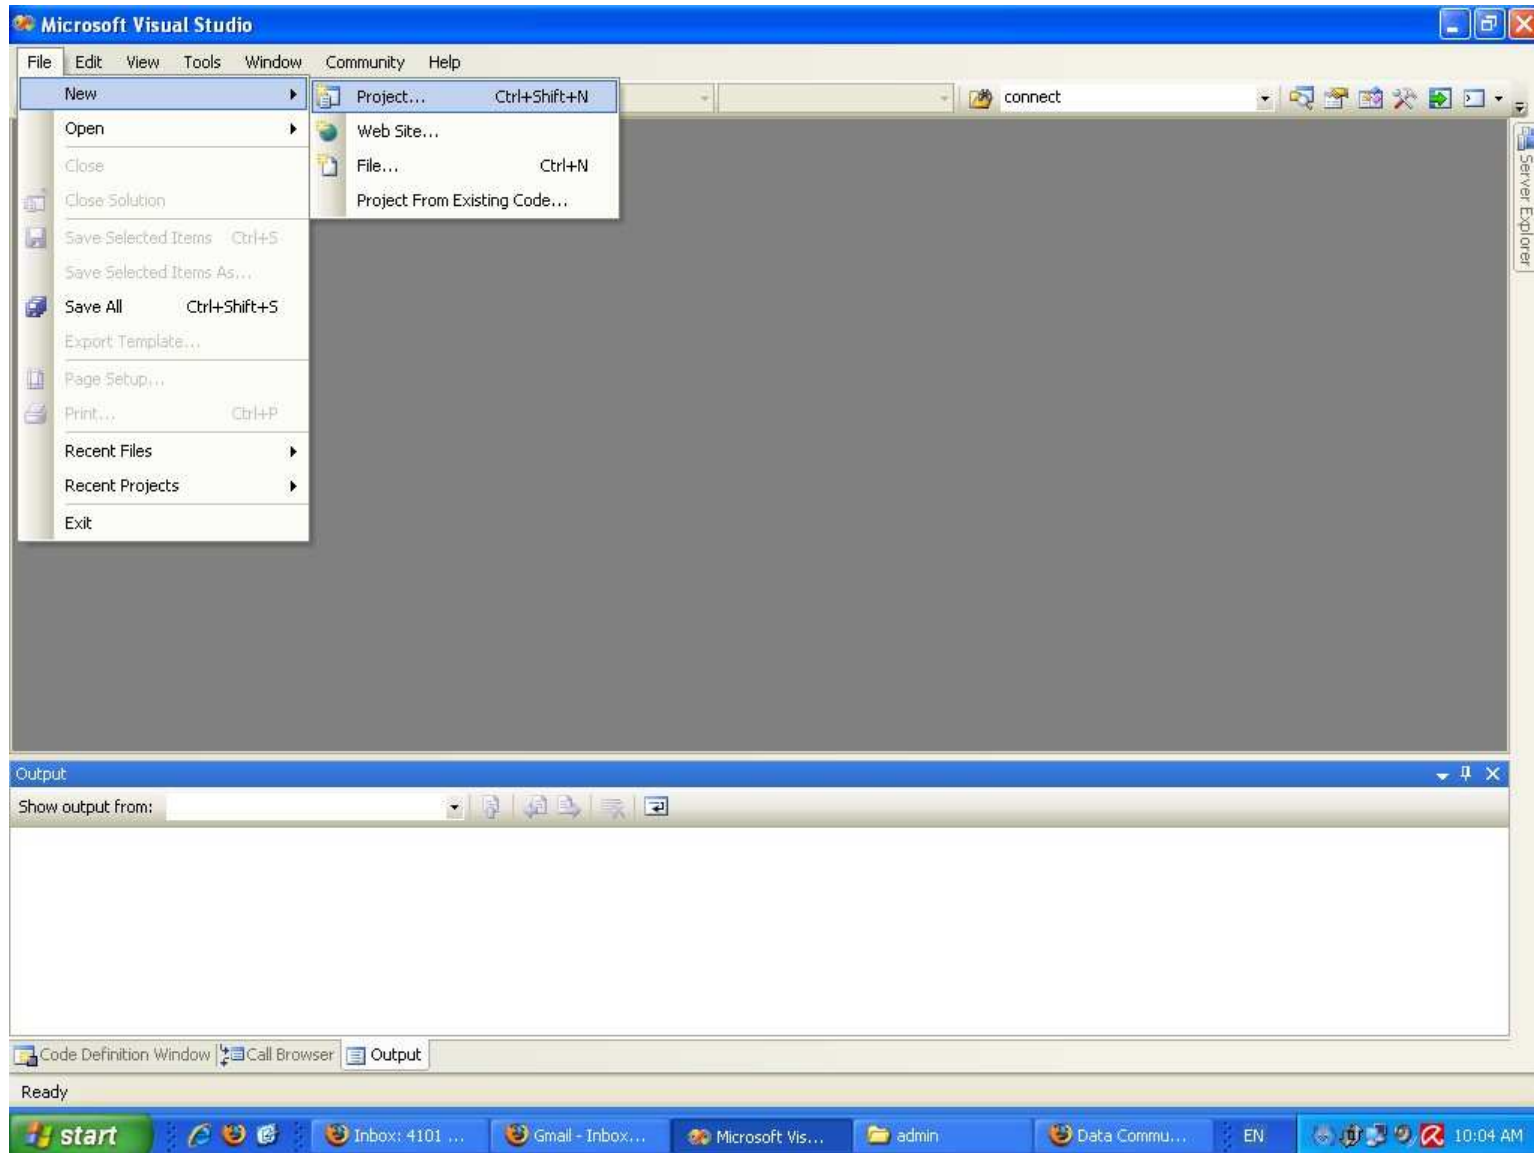

Figure 1: Start up the “Visual Studio 2005”, and create a new project

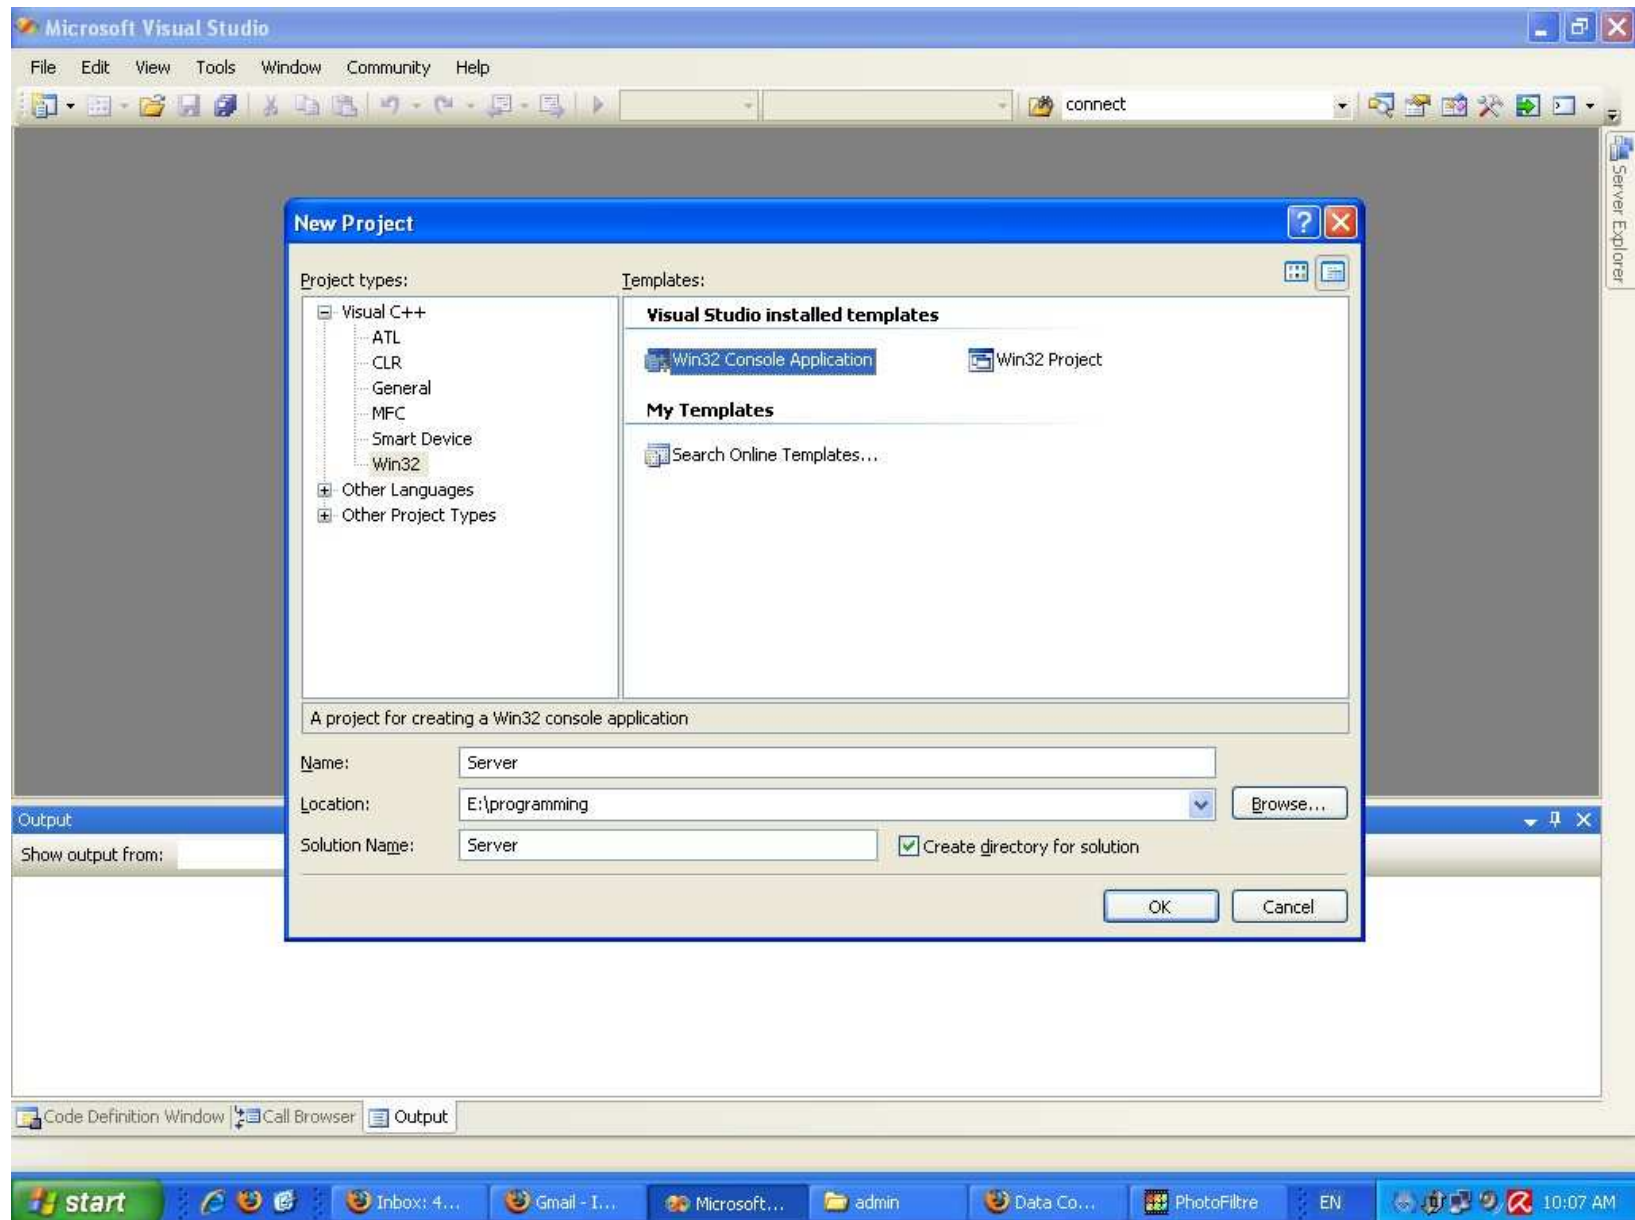

Figure 2: The settings of project configuration

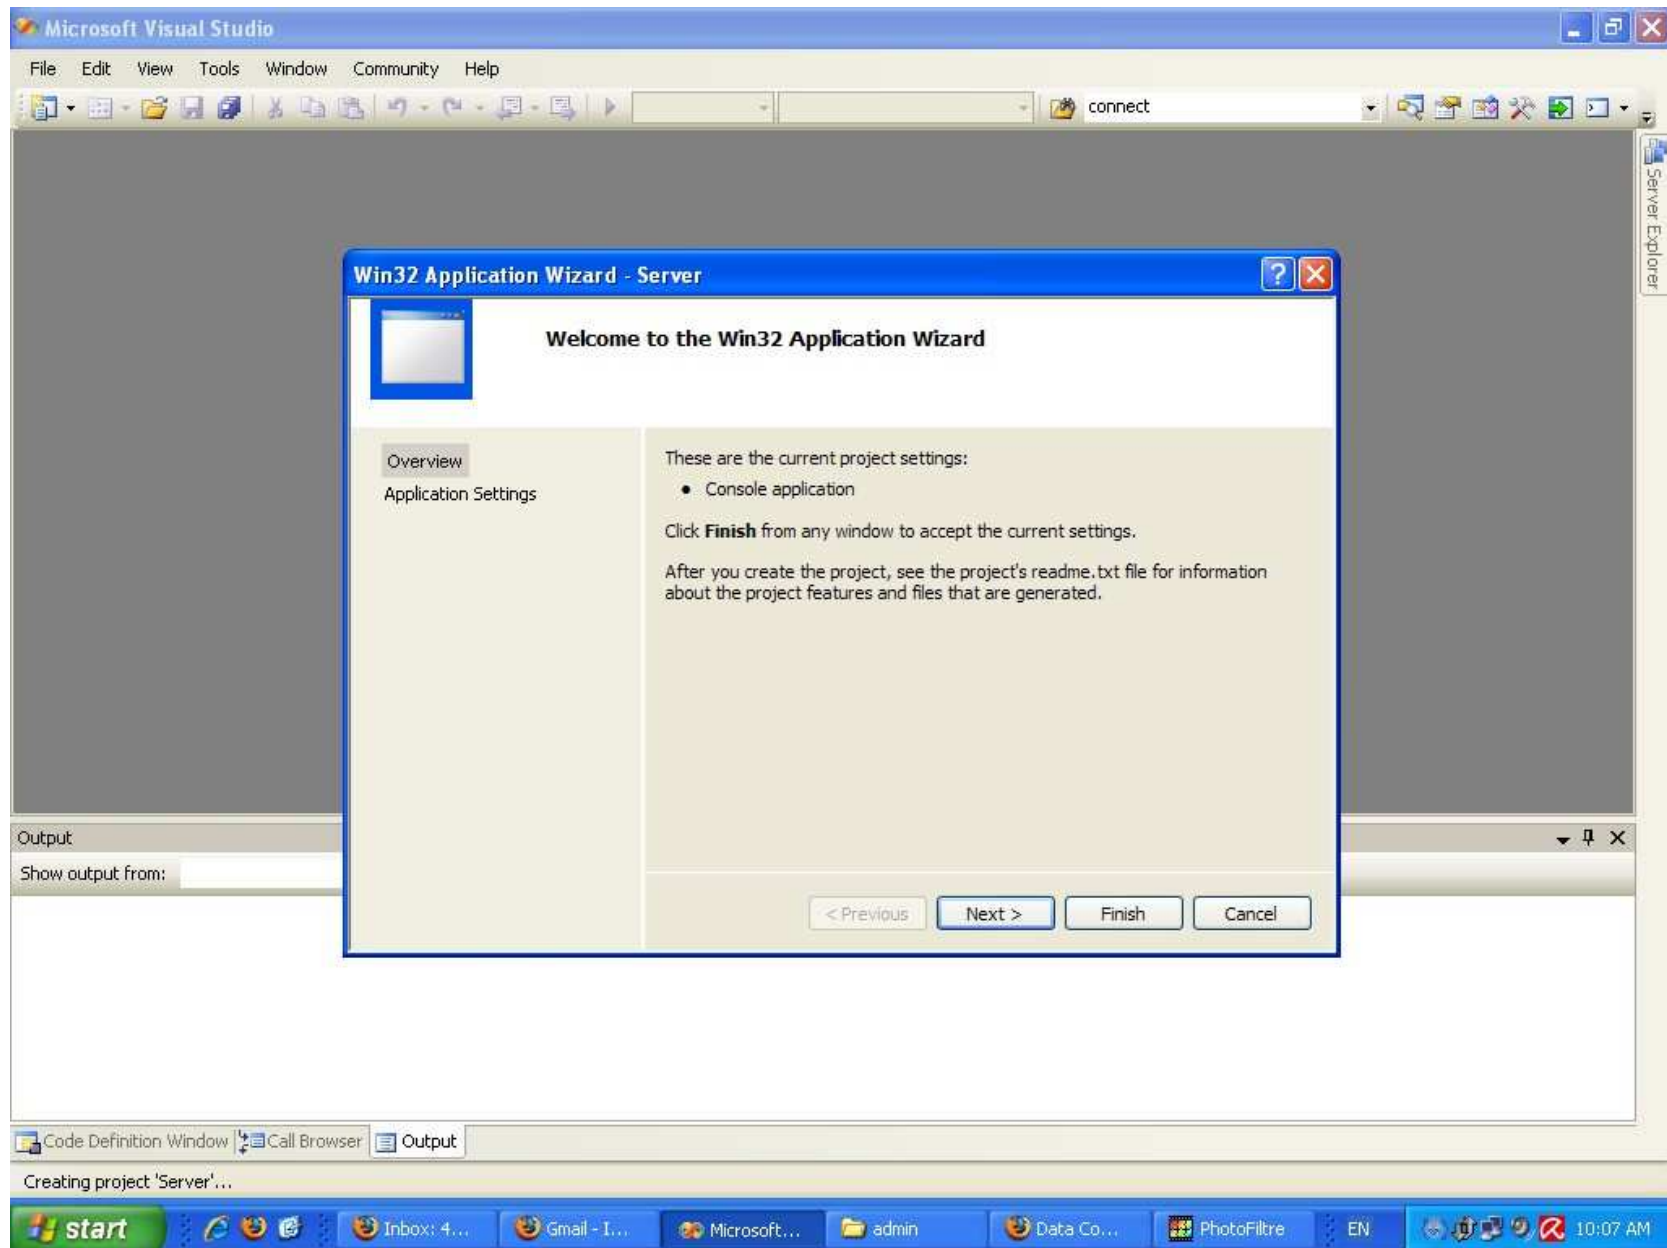

Figure 3: Click ‘next’

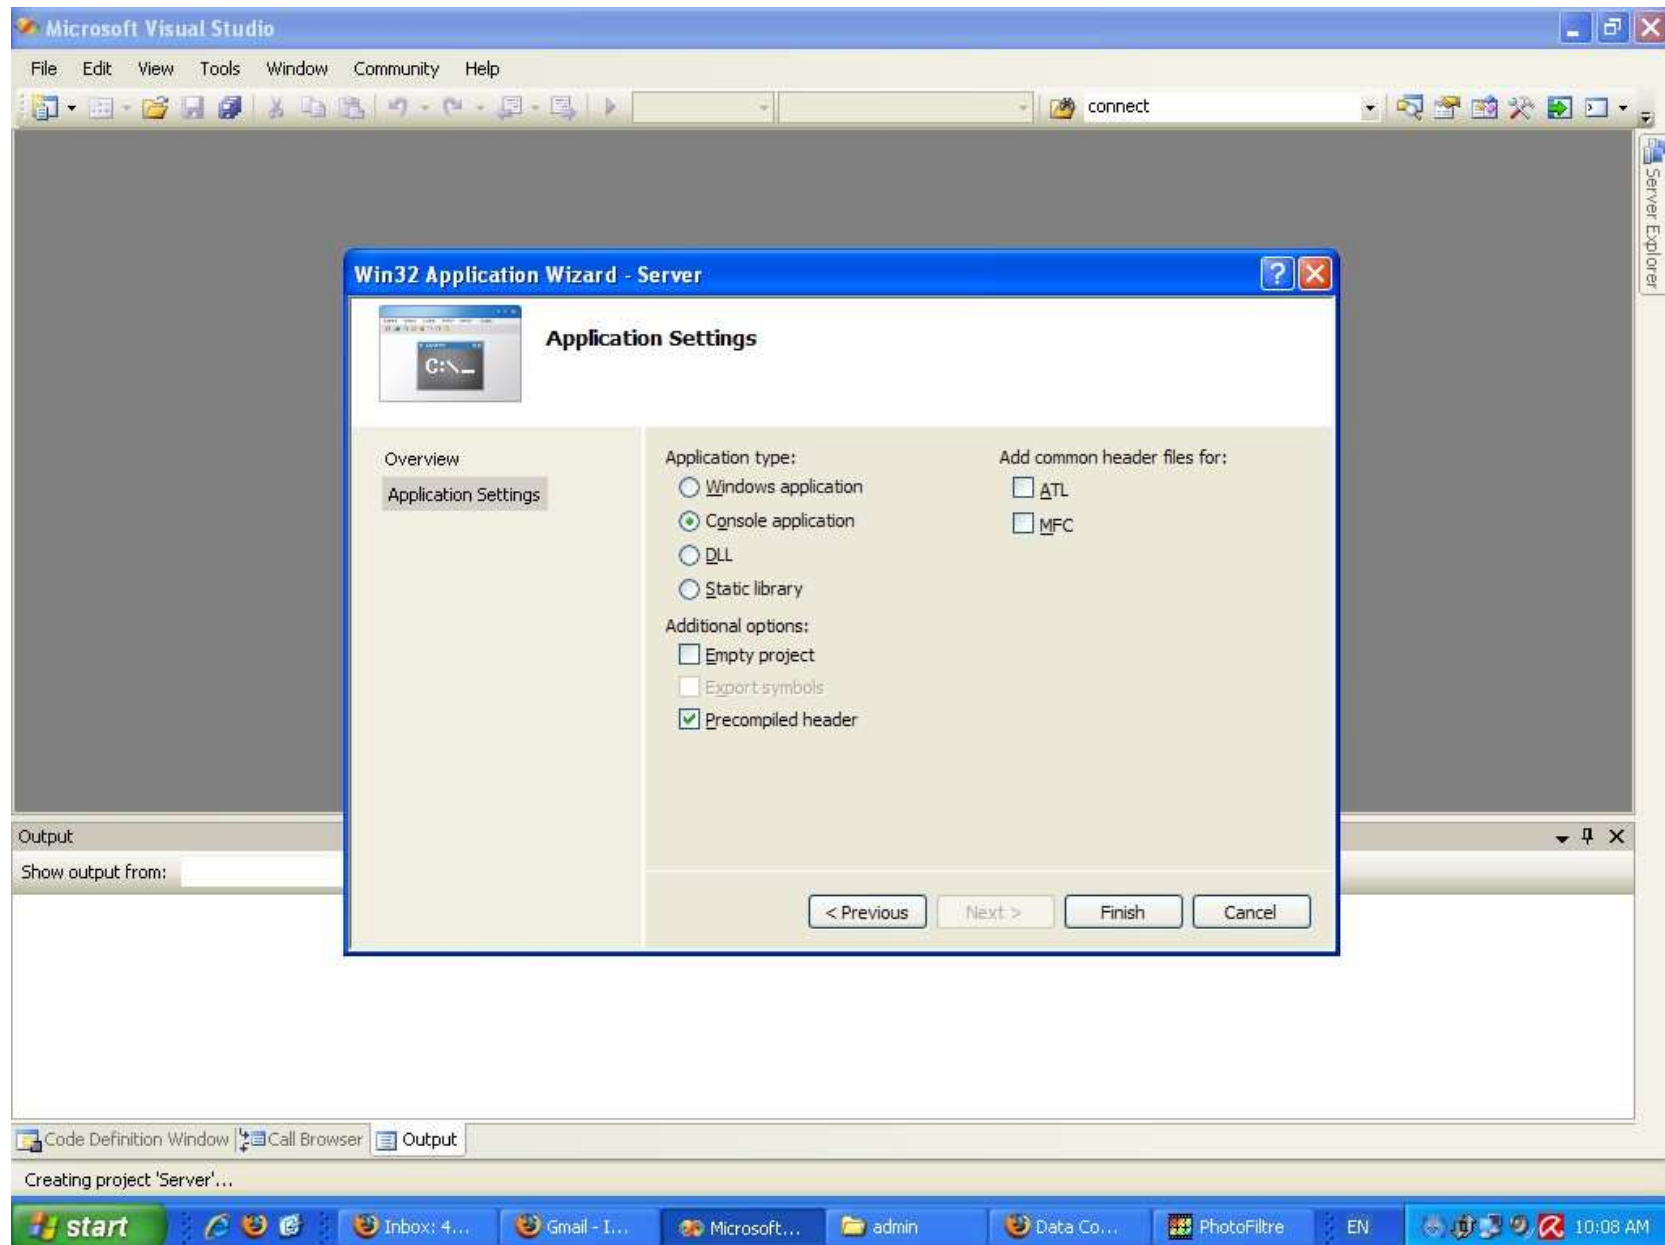

Figure 4: Click 'Finish'

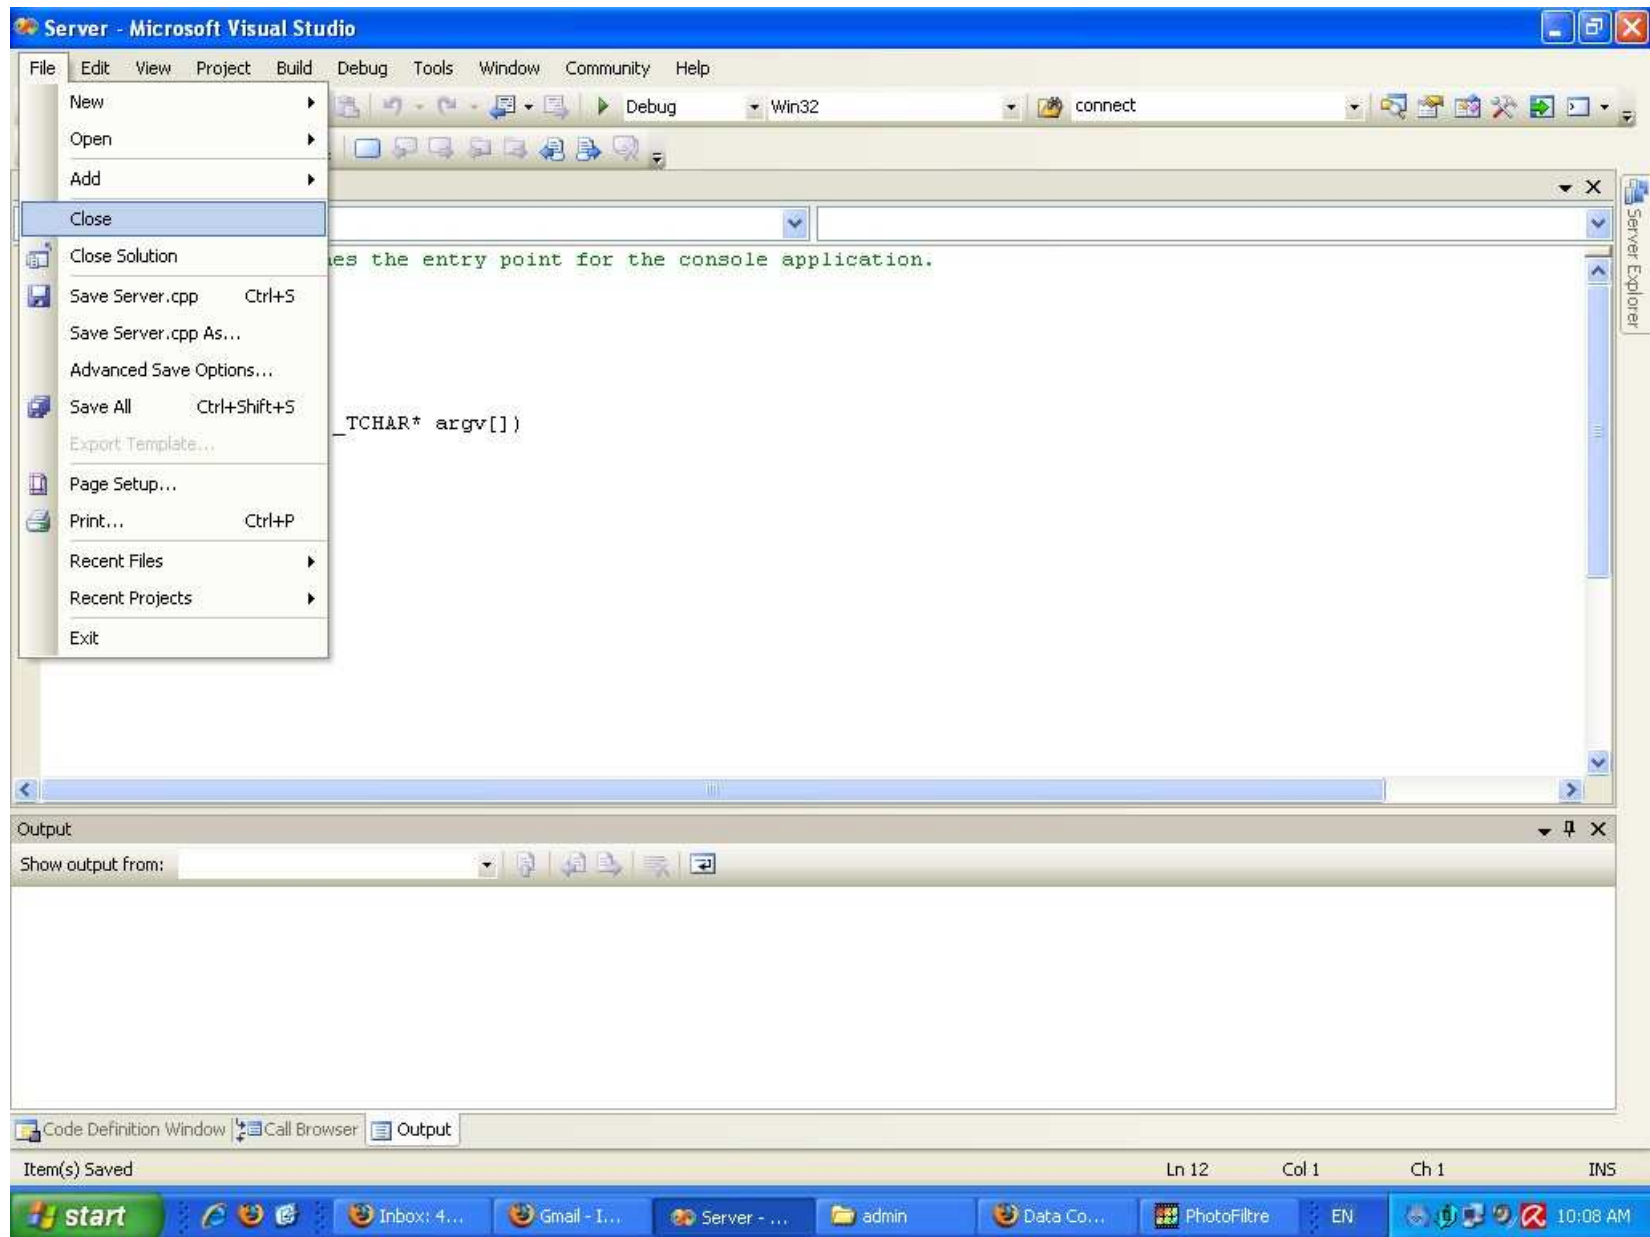

Figure 5: Close the whole project

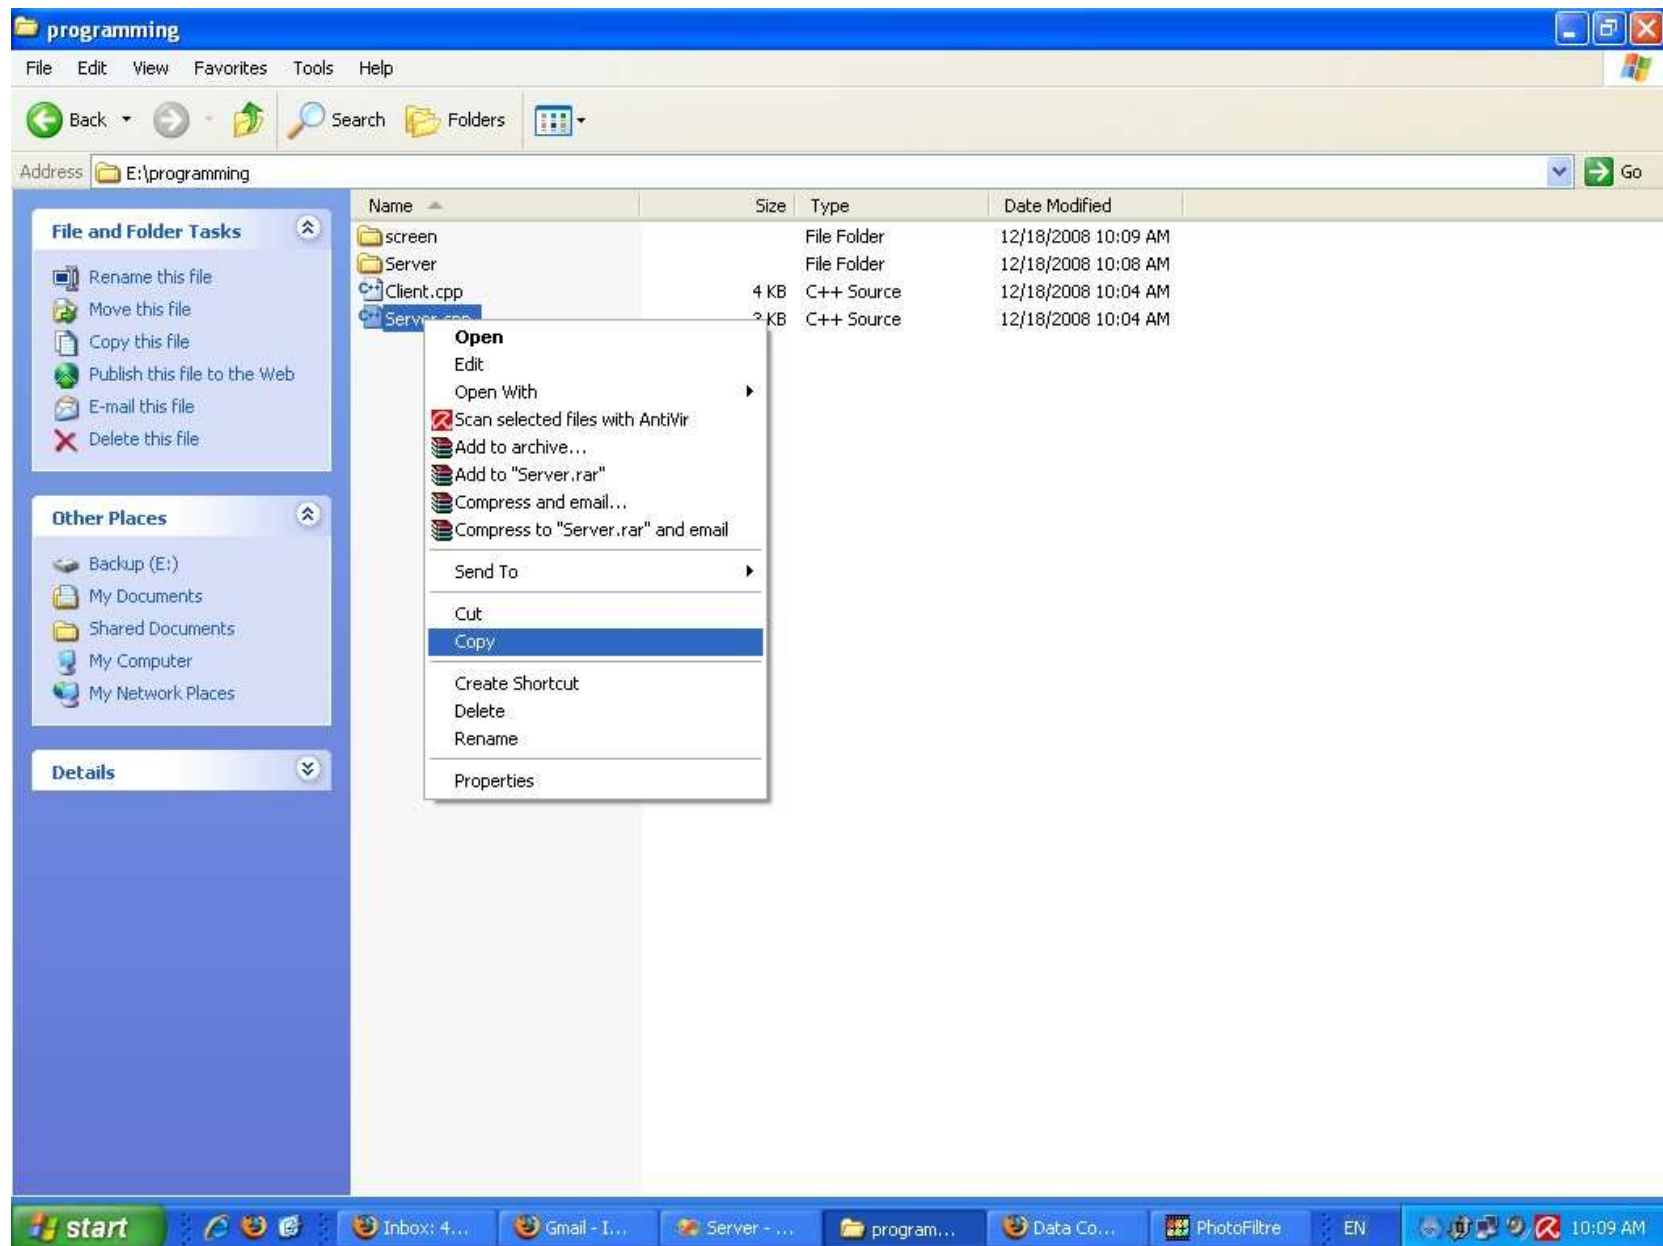

Figure 6: Copy the source code downloaded from the Web site

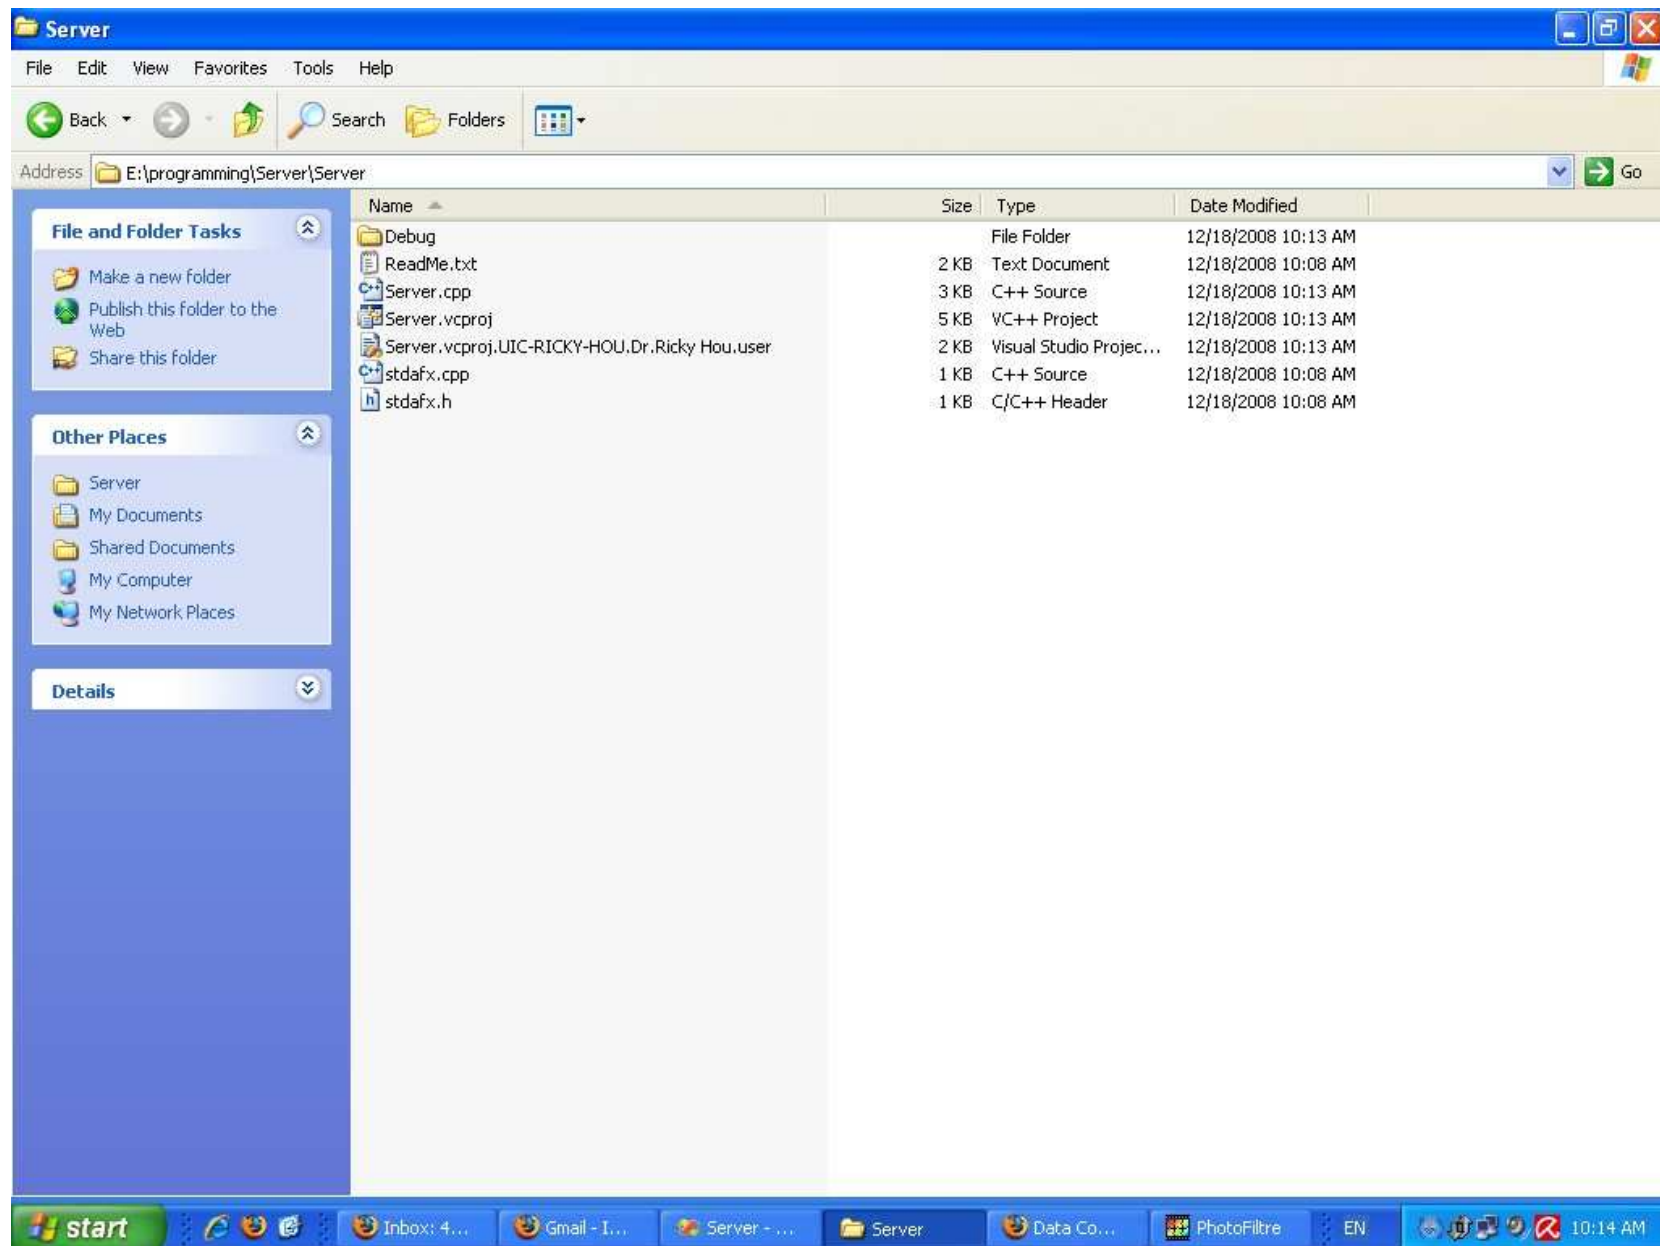

Figure 7: Replace the server.cpp with the file downloaded from the Web

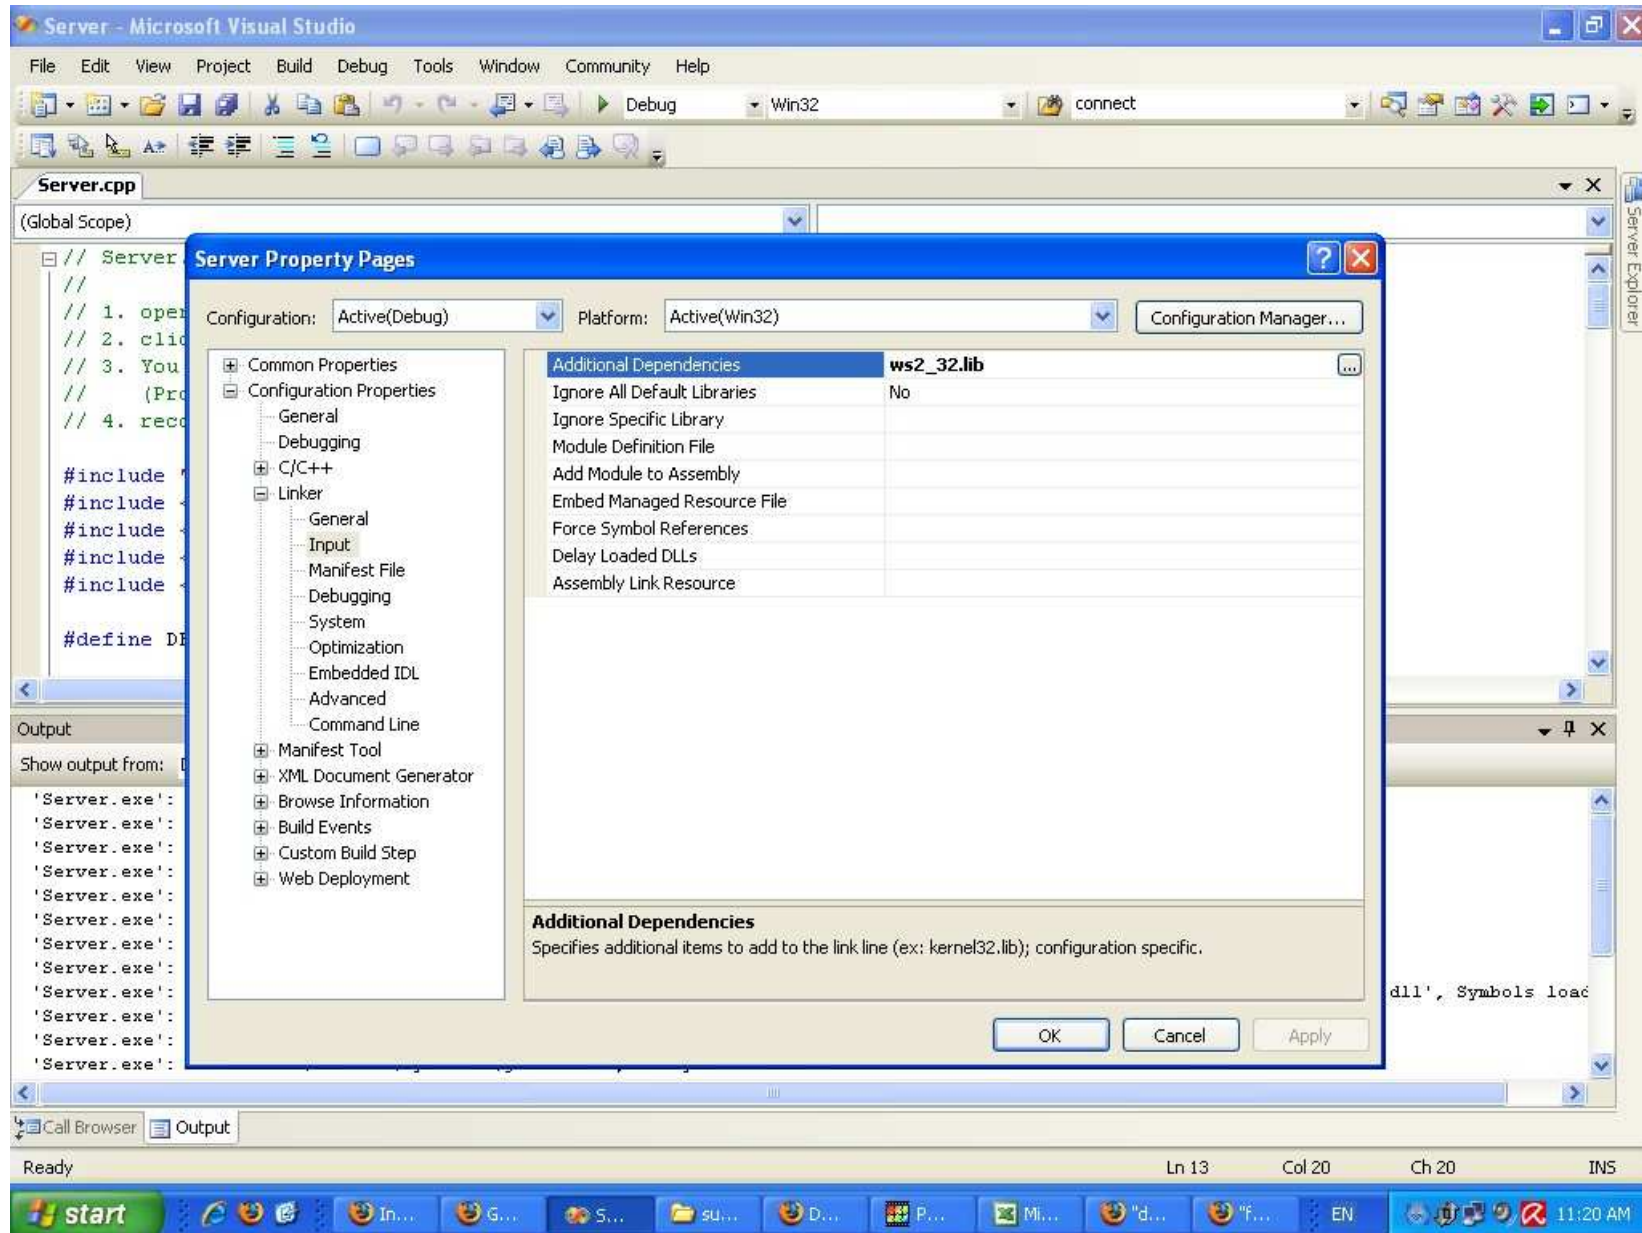

Figure 8: Add the library 'ws2_32.lib' to the project

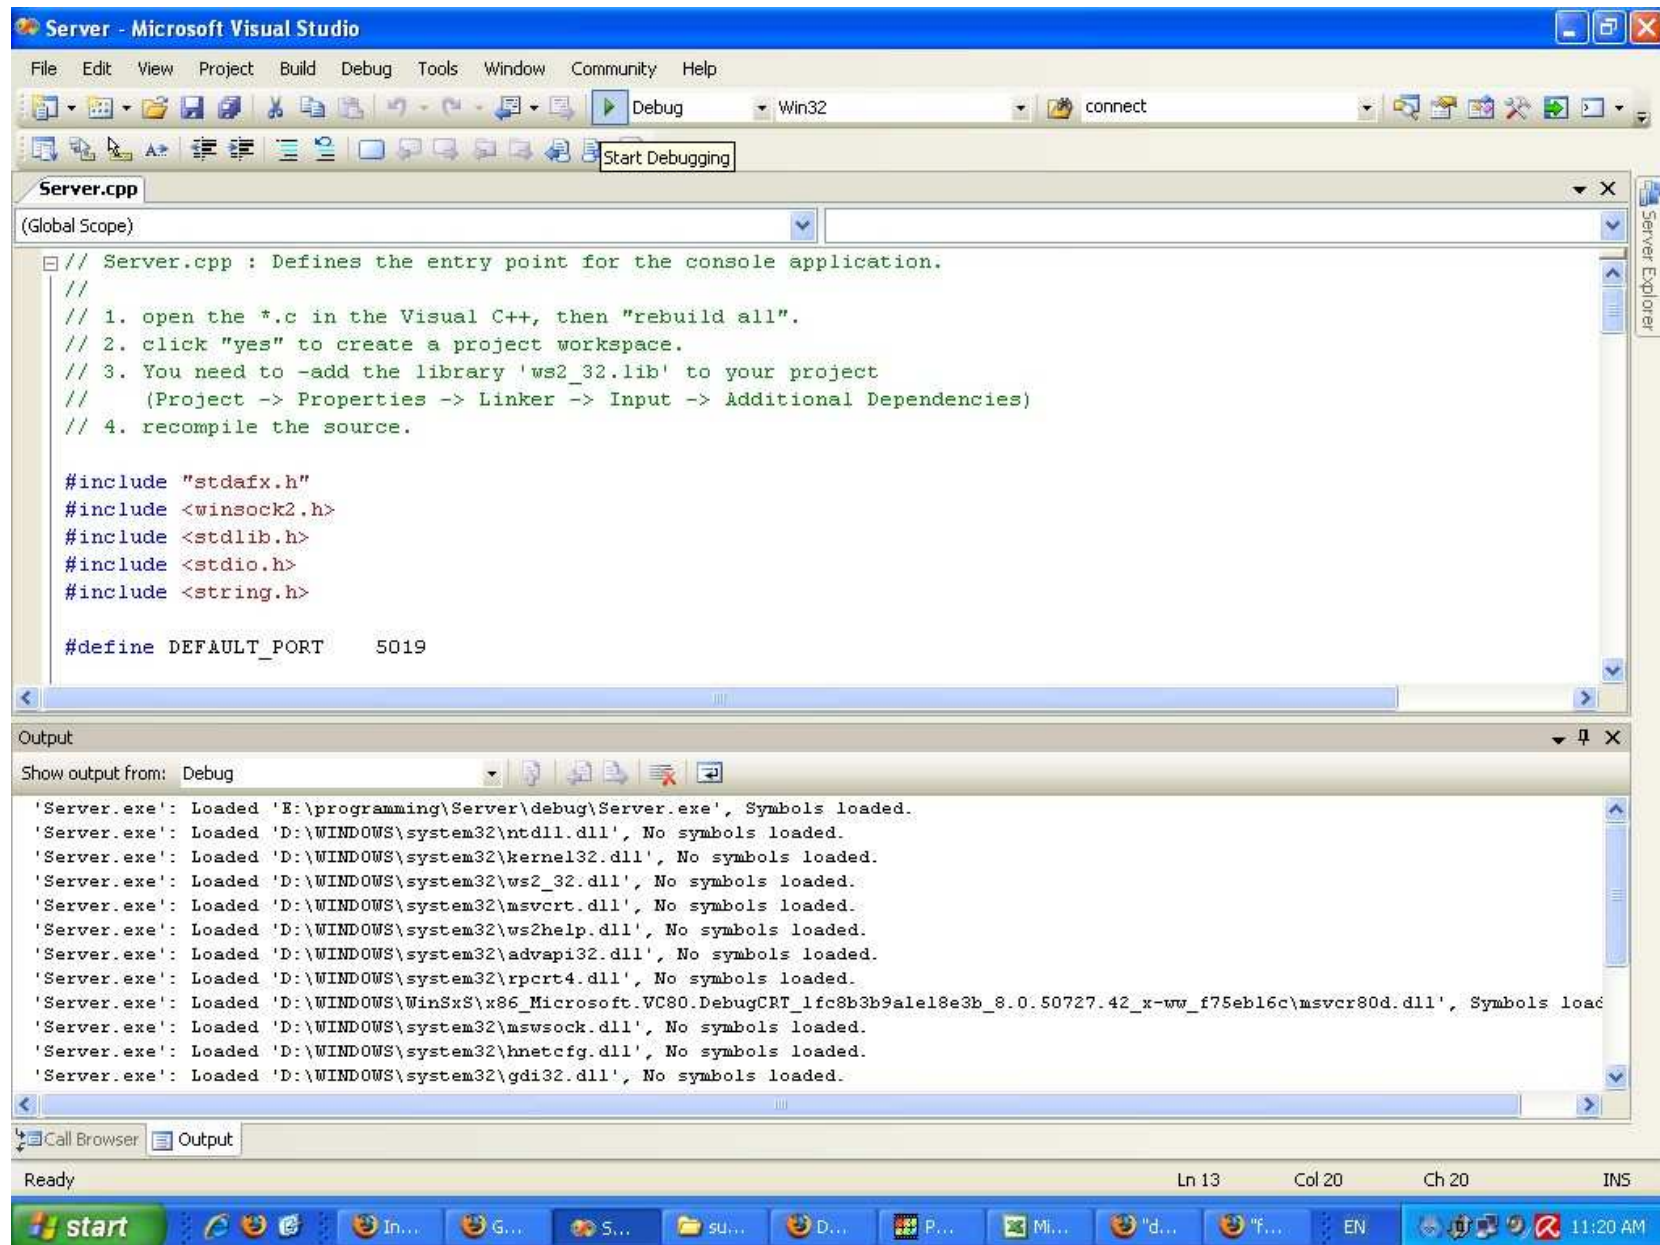

Figure 9: Compile the project

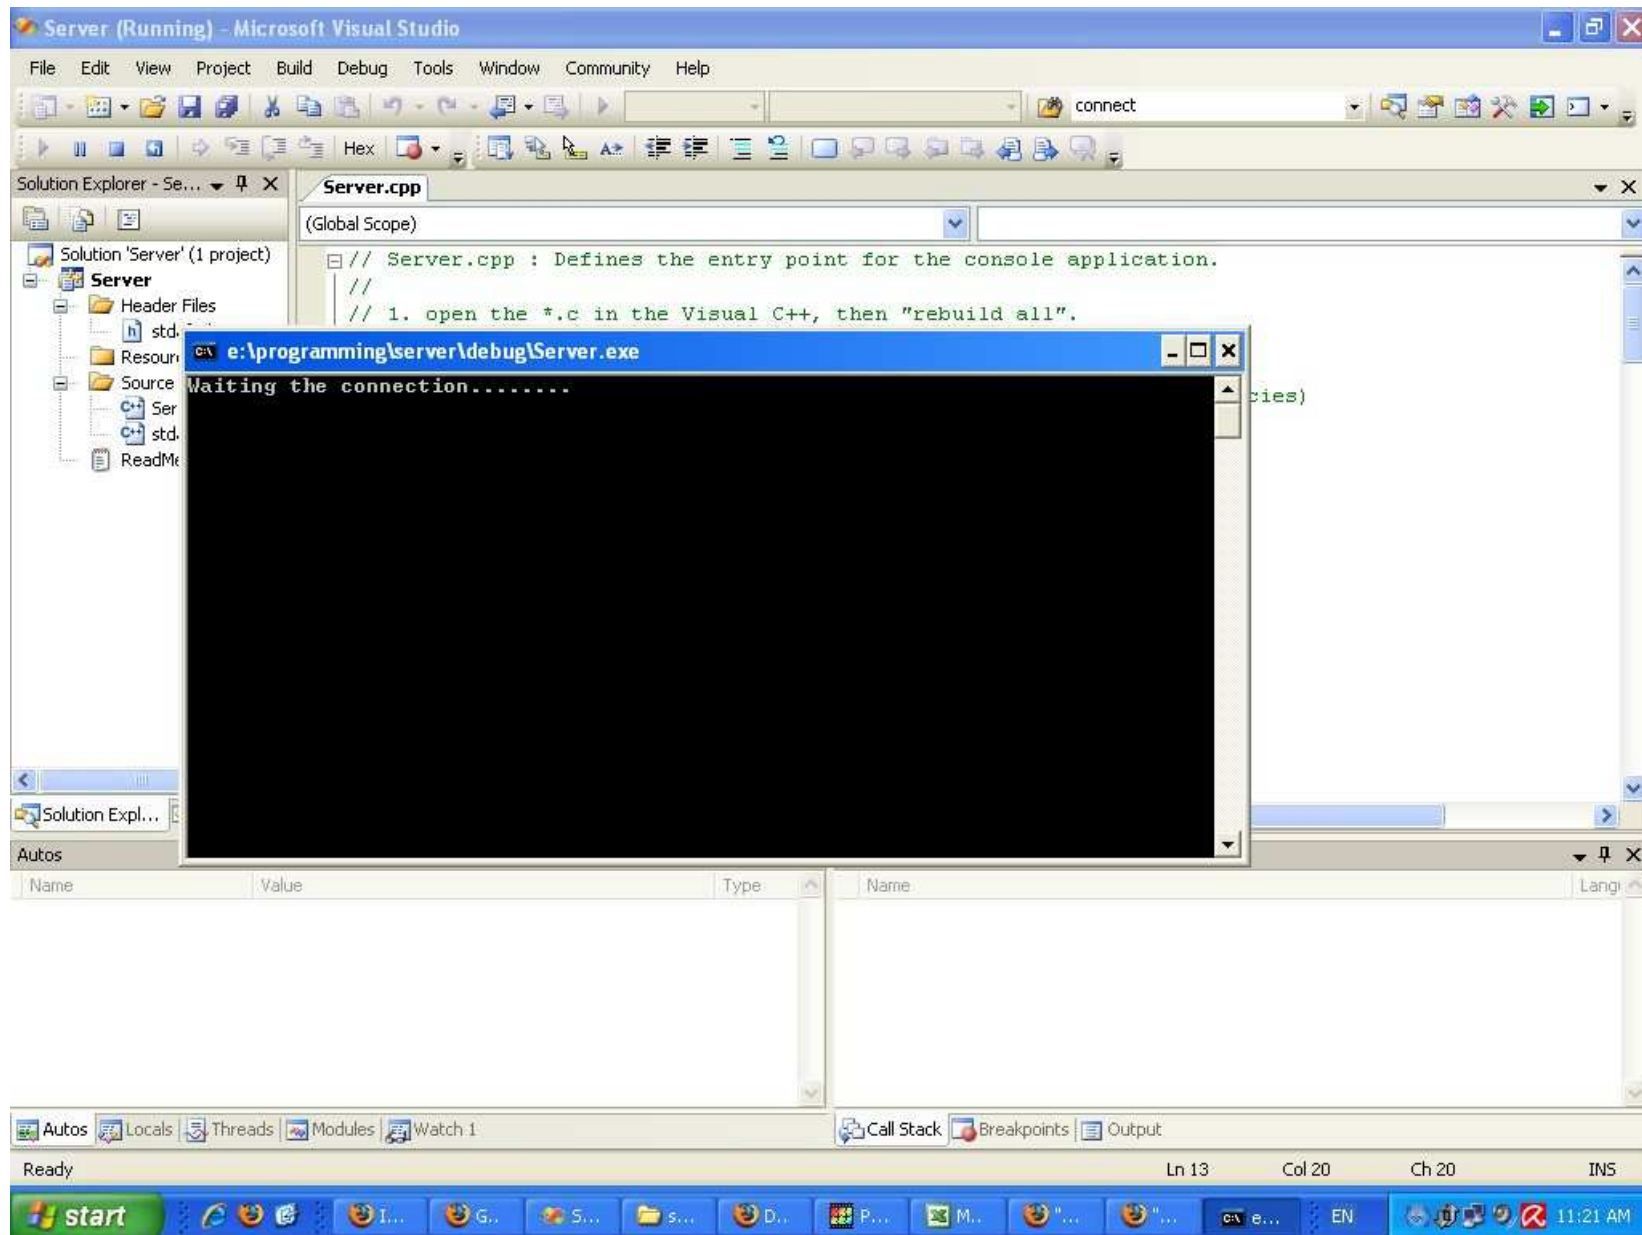

Figure 10: If the compilation is successful, a dialog will be appeared on the screen

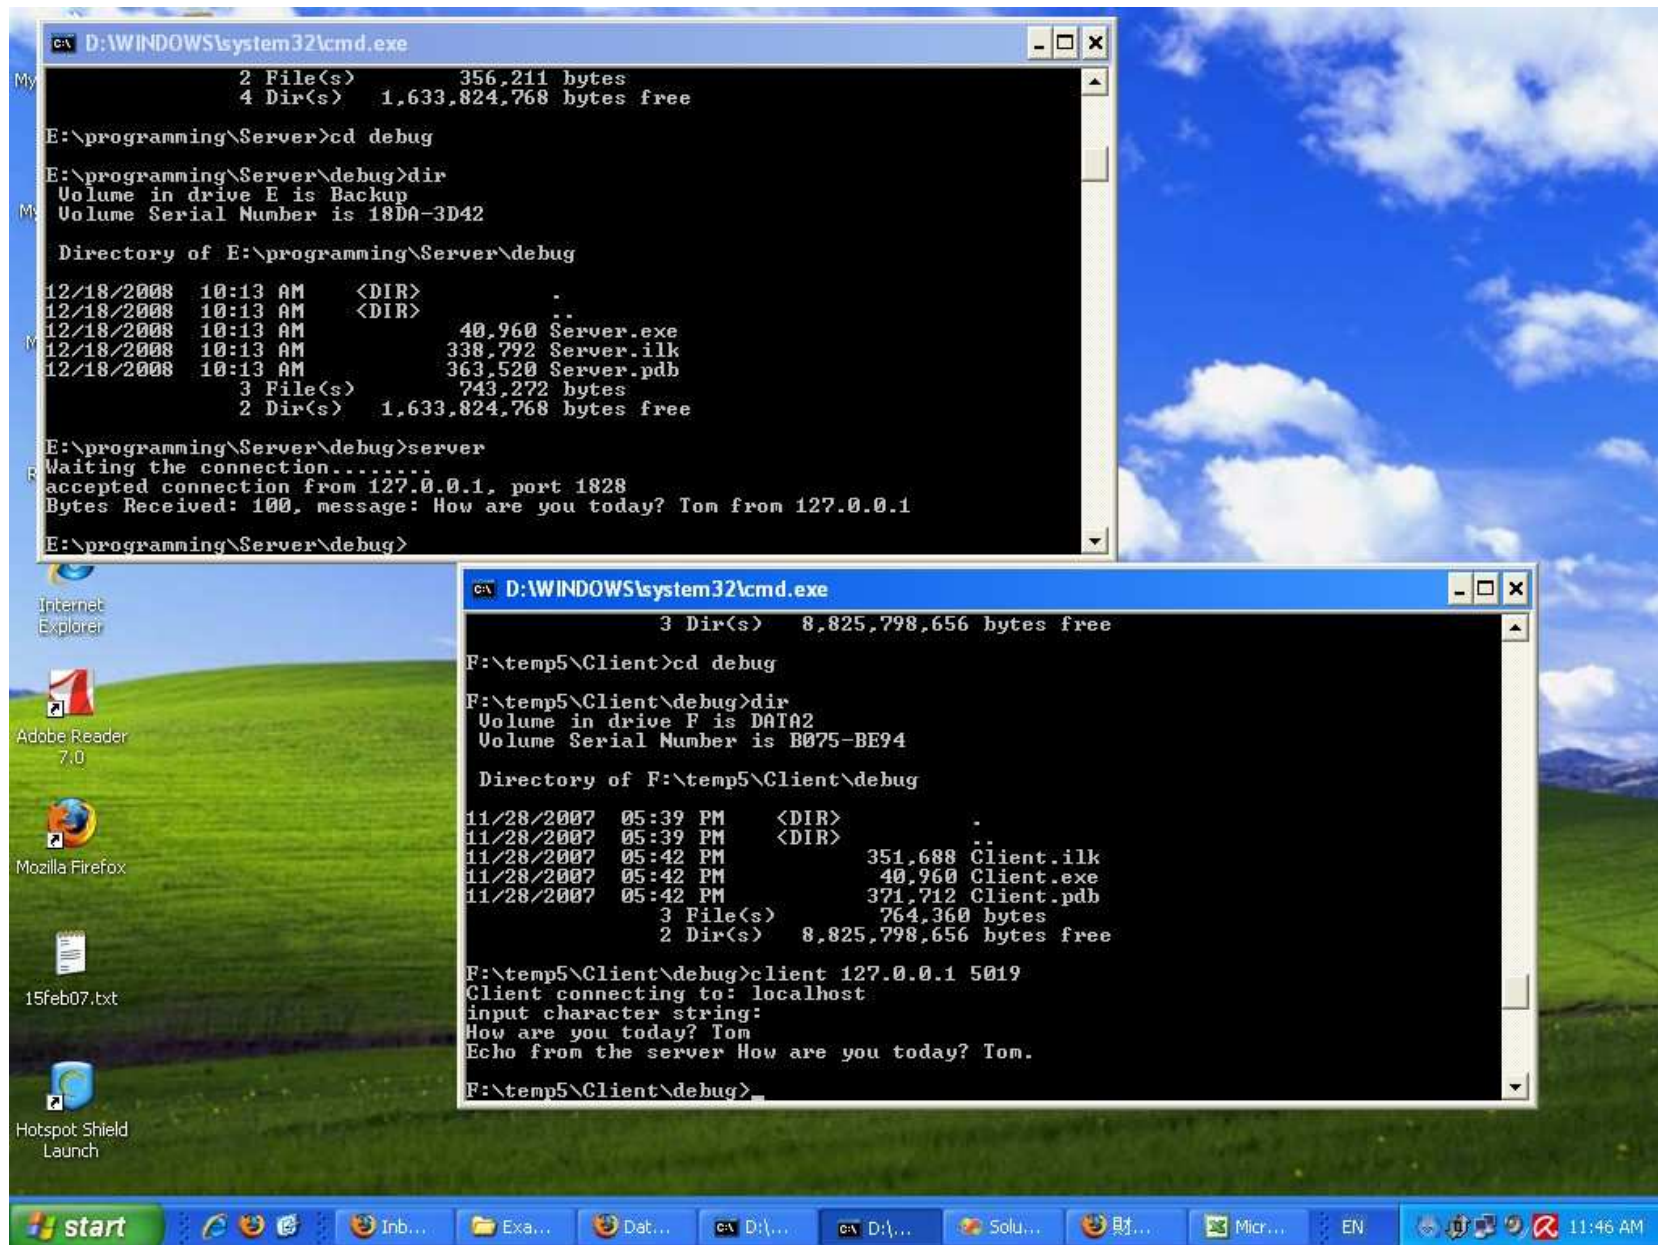

Figure 11: Execute the programs
